

The Creation Map shows the logical land of the Pattern. The map reveals geometric features of the Pattern landscape that match structures that are described in Scripture and structures that are found in Nature.

The Eden Cube is structured according to the descriptions in Genesis 1 and Genesis 2.

The Creation Cube is Nature's higher-dimensional creating mechanism (vacuum) that consists of twelve duonity modules.

The Pattern Cube is the compact (3D) version of the Creation cube. It has a cover whereas the Creation cube is a 'naked' cube.

A Standard Atom is an atom which is structured according to the Standard cube which is a geometrical representation of the Standard Model of the Elementary Particles. (A beryllium atom is used as an example of such a standard atom.)

The Creation Map

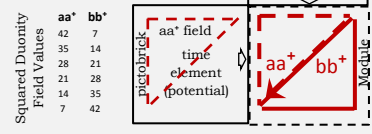

What if there were a universal Pattern, just one mould (a forming thing) for all that exists? Explore the Pattern of creation on this map.

10 The Creating Cube

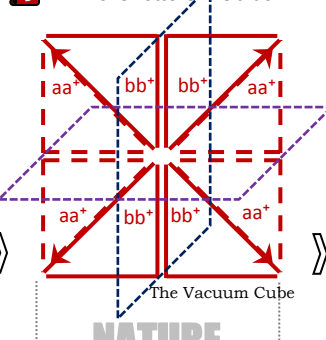

The Creating cube consists of twelve creating modules. A creating module reflects the zero point motion of a quantum pendulum with the aa' field the potential energy and the bb' field the kinetic energy.

Particle Pair Creation

The 'uncertainty' between the duonity field (aa' and bb') values (see below) causes a boost action across the energy inversion line of the module. The action creates a fleeting virtual particle pair.

9 The Creation Cube

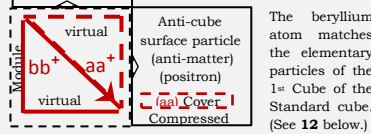

11 The Created Cube

The created particle pairs typically annihilates owing to the Planck time limit. Some pairs could collapse (split) if they come close to a black hole (anti-cube). One particle then becomes part of the hole's surface and the other becomes real.

A Standard Atom

The real particles originating from the cube could assemble into standard atoms. A standard beryllium atom, for example, consists of electrons, muons, taus, protons & neutrons.

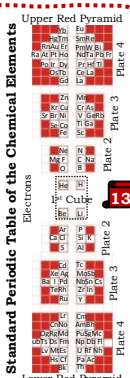

12 The Standard Cube

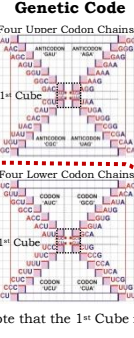

The Standard cube is identical to the Pattern cube and is a geometric version of the Standard Model. It consists of all the quantum fields/particles of the Standard Model of Elementary Particles. (See the Guide for detail.)

Pictographs such as pictobricks are used to represent the different fields/particles of the Standard cube.

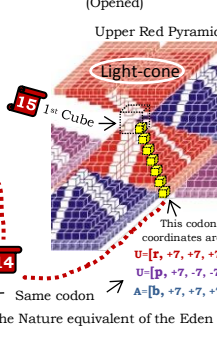

The red pyramid pair of the Standard Periodic Table (SPT) (on the right). The other two pyramid pairs are the muon and the tau SPTs.

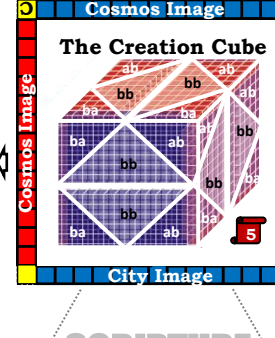

The Geometric Genetic Code

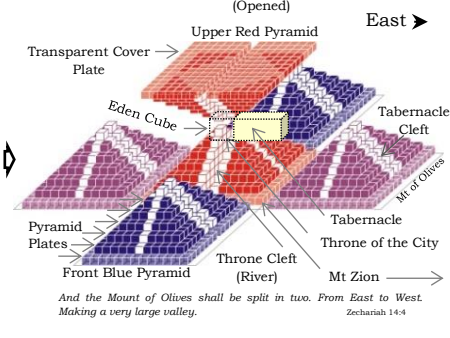

The Cosmos Cube (Opened)

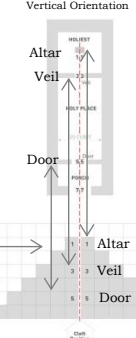

The Pattern Cube

6 The City Cube (Opened)

The Temple

The City Space

The City cube is an arena for key biblical structures such as the tabernacle, temple and the throne in the New City. The opened cube matches the environmental features of Jerusalem, e.g. Mt. Zion and its river and the left in the Mt. of Olives according to Zechariah 14.

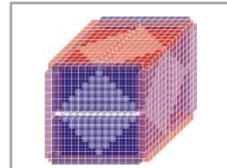

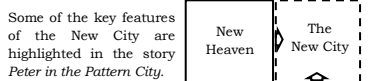

The Pattern of the Temple

The openings of the vertically orientated temple of Ezekiel match the Pattern value pairs (1:1, 3:3, 5:5). The cleft position is indicated but the cleft is not expressed (like it is in the opened Cube).

8 The New City

The un-creation of the current creation will result in a new (Pattern) creation. According to Revelation the new creation will be the New City; a duonity of the New Heaven and the New Earth. The foundations of the City match the Pattern cube's cover plates and most of the other City features also match components of the cube.

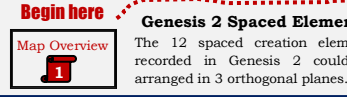

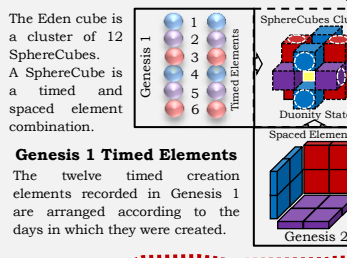

There will, however, be no sea, which likely refers to the anti-creation 'black hole' (anti-cube).

The Eden Cube

Duonification
Duonification creates duonity.

Thou son of man, shew the house to the house of Israel, that they may be ashamed of their iniquities; and let them measure the pattern. Ezekiel 43:10

The Fall

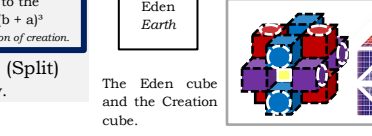

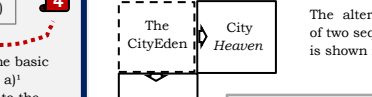

The Pattern Equation
(a + b) = c & c = (b + a)

The centre cube/cluster is the solution to the basic Pattern equation: (a + b)³ = c³ & c³ = (b + a)³
The Creation/Pattern cube is the solution to the cubed Pattern equation: (a + b)³ = c³ & c³ = (b + a)³
The cluster is the creation configuration; it yields the equation of creation.

Disduonification (Split)
Disduonification collapses duonity.

7 The CityEden

The shadow map below shows the CityEden as a duonity of the City and the Eden. This duonity implies that the City (Heaven) and the Garden of Eden (Earth) was originally one and the same place. The CityEden scenario is based on Ezekiel 28:13. You were in Eden, the garden of God. Every precious stone was your covering. (The stones seem to refer to the foundations of the City, like those of the New City.) The implication of this scenario is that the Fall of Lucifer and the Fall of Adam (and Eve) was one and the same (dis)duonity incident.

The Eden cube and The Creation cube.

"...we will grasp the central idea of it all as so simple, so beautiful, so compelling that we will all say each to the other, 'Oh, how could it have been otherwise! How could we all have been so blind for so long!' J A Wheeler
